Work Experience

Trainee Software Engineer - 99x

- **B.U.S.** Oct 2023 - Present
Involved in developing new features and resolving bugs for core BUS products — BUSkvalitet, BUSpek, and BUStest — fully web-based applications designed for managing vehicle valuations and inspections across the Norwegian and Swedish markets. Key contributions include the design and implementation of the BUStest P3 GraphQL API, development of React core components library for reusable UI elements, and active participation in building the all-new Platform 3 for BUStest, launched in 2025.
- **Parkly** Dec 2022 - Oct 2023
Contributed to resolving frontend and backend bugs, enhancing proficiency in C# and .NET technologies. Gained hands-on experience with the Azure cloud platform and its various services. Additionally, developed a domain-specific chatbot using Azure OpenAI by training a model on project documentation, enabling developers and QA teams to efficiently clarify domain-related queries.
- **DevGrade** Apr 2022 - Oct 2023
Implemented key features such as MCQ integration into assessments, AI-generated question creation, and a complete UI/UX revamp of the platform. Contributed to resolving frontend and backend issues, enhancing expertise in Node.js and Angular. Gained experience with AWS services, including Lambda functions and user management. Also served as a key contributor to the successful organization of Hacktitude 2023, a hackathon conducted for undergraduate students in Malaysia.
